

HACE : The Child Labour Index

Company Engagement Package

Why disclose to us?

Recent and upcoming legislation focuses specifically on child labour and has increasingly severe consequences for companies, along with the subsequent financial, reputational and operational risk.

Working with us helps you to avoid these consequences and contribute to Sustainable Development Goal 8.7. Unlike some other ESG indexes, we involve companies in our scoring process to ensure the HACE Child Labour Index is objective, accurate and impactful.

thisishace.com

Public perception

How potential customers view a company's association with child labour

Risk of exposure

How susceptible a company's supply chain is to child labour

Your score breakdown

Publicly available disclosure

How well companies are identifying, managing and remediating child labour in their supply chains

Additional disclosure

While part of the score is calculated using your publicly available disclosure, you can impact your score by supplying additional information. When you work with us in this way, you receive our *HACE Discloser Badge*. This shows your investors and consumers you're committed to eradicating child labour in your supply chains.

How does it work?

[CONTACT US](#)

1

We send you a questionnaire and ask you to submit documents relevant to your child labour approach and performance, along with other ESG documents.

2

Disclosing or supplying items on our checklist earns you points towards your HACE Discloser Badge, which is renewed annually when you continue to disclose to us.

3

Your points accumulate and you receive a Bronze, Silver or Gold Discloser badge according to our tiered points system. This is displayed on the Child Labour Index portal and you can also use it for external reporting.
